DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Beard et al. (USPN 4,493,204).

Beard et al. discloses an infusion pump comprising a pump barrel (32), a plunger rod (36) with a longitudinal axis, a threaded drive screw with a longitudinal axis that is parallel but displaced from the plunger rod, and wherein the assembly has two position, the first position being a loading position and the second position being an operating position (Figures 1,2, 5, and entire reference).

Allowable Subject Matter

3. Claims 1-5, 7 are in condition for allowance. The reasons for allowance are the two different structure elements for the reservoir and barrel, and wherein the rotating screw and barrel having different longitudinal axis's.

Response to Arguments

4. Applicant's amendments of the claims and the arguments, filed 11/13/06 with respect to the claims have been fully considered, and are persuasive. Therefore the 102 Rejection in view of Sams has been withdrawn, and the claims are in condition for allowance.
